

A decorative graphic of a DNA sequence. The sequence is represented by large, bold, colored letters: 'A' (green), 'T' (red), 'G' (yellow), 'G' (yellow), and 'C' (blue). The letters are arranged in a row, with the 'A' and 'T' being slightly larger than the 'G's and 'C'. Below the letters are horizontal lines of various colors (red, green, blue, yellow) and small rectangular blocks, suggesting a DNA double helix structure. The background is white.
